Operational

IG Inspection of

25X1A6c

REFERENCE:

13 May 1957

Regarding your request in reference, I apologize for the delay in forwarding a copy of the report, but as you can see from the attached it is quite voluminous and we had to prepare a sterilized version for transmittal to the field. Sterilization, of course, involves many of the problems of translation and we may have occasionally mixed our I am sure, however, that you will find the report intelligible and informative.
